Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 35, 36, and 37. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 15, 17, 46, 47, and 51. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Neubrand (6,217,104).

Neubrand discloses a method of fitting equipment on a vehicle. A vehicle structure (12) is supplied with a back, a top, a passenger compartment, a trunk, and a windshield frame, as shown in Figure 1. An opening closeable by means of a retractable roof (10) is defined between the windshield frame and the trunk, as shown in Figure 1. A modular roof assembly (10) is supplied as a single part onto the vehicle structure, as shown in Figure 1. The retractable roof comprises a first, rigid roof part (36) and a second, rigid roof part (38) that move between an extended position, shown in Figure 2, in which they cover the passenger compartment and a folded position, shown in Figure 6, in which they are retracted into a roof storage space delimited in the trunk. A retractable roof support body (14) is adapted to be locked to the vehicle structure. The modular roof assembly (10) is inserted inside the vehicle structure from the rear and top of the vehicle through said opening for the retractable roof. The retractable roof support body is positioned and locked to the guiding housing and locking elements (26,30,32) provided on the vehicle structure, as shown in Figure 1. The passenger compartment vehicle internal trim and seat are installed after the roof installation. This is inherent since the seats would interfere with the roof installation.

In reference to claim 11, the roof parts are in the folded position when the roof assembly is inserted inside the vehicle, as shown in Figure 1.

Allowable Subject Matter

5. Claims 1-9 and 16 are allowed.
6. Claims 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
